

# Vista

## The Amplifier that Brings Hands-Free Convenience to Your Office Phone

Plantronics headsets have become the world's talking point, with more than six million in use today.

Vista™ Universal Amplifiers connect Plantronics headsets to just about any modular single- or multi-line phone\* and offer ergonomically designed volume, headset/handset, and mute controls.

With its easy-to-use one-button selection of headset or handset, Vista amplifiers deliver precise levels of listening and talking comfort, superior protection, and excellent audio performance to your office telephone.

### Talk to Plantronics

Vista Universal Amplifiers are just one of the many superior communications products offered by Plantronics. If you would like to know more, contact your distributor/dealer. They'll tell you why the world is talking about Plantronics headsets...and into them.

## Vista™ Universal Amplifier

- **Easy to Install and Use.** Vista Universal Amplifiers adapt almost all telephones for use with a wide range of Plantronics headset styles.
- **Easy One-Button Controls.** Select between your headset and handset at the touch of a button. Separate controls allow independent adjustment of outgoing and incoming volume.
- **Superior Sound Quality from the Leaders.** Plantronics' SoundGuard®Plus™ delivers automatic sound protection by keeping incoming sounds at comfortable hearing levels. Call Clarity™ technology sets a new standard for sound quality.

\* Will not work with dial-in-handset or cordless telephones.
